## **EXAMINER'S AMENDMENT & REASONS FOR ALLOWANCE**

## I. EXAMINER'S AMENDMENT:

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Grant Rodolph (Reg. No. 50,487) on 2/1/06.

In the claims:

Claim 23;

Rewrite claim 23 as follows:

A computer system for delivering information within a computing environment, comprising a method for:

- a) extracting information from an information source;
- b) transforming the extracted information;
- c) isolating the transformed information by wrapping the transformed information into a message envelope having a standard format;

Application/Control Number: 09/843,682 Page 3

Art Unit: 2194

d) routing the message envelope to at least one information target;

e) unwrapping the message envelope to reveal the transformed information;

f) mapping the received information to a format required by the information

target;

g) transforming the received information; and

h) loading the transformed information into the information target; wherein

the routing step occurs at a different resource than the extracting, the transforming, and

the loading steps (a)-(c) such that the extracting, transforming, and wrapping steps may

be executed simultaneously for a plurality of information sources distributed across the

computing environment to produce a plurality of message envelopes and wherein the

routing, unwrapping, transforming and loading steps (d)-(h) are repeated for each of

each of the plurality of message envelopes.

Claims 24-27;

Line 1, replace "method" with – computer system --;

II. REASONS FOR ALLOWANCE:

The prior arts of record do not explicit teach or render obvious the invention as

recited in the independent claims.

Art Unit: 2194

The Smith (U.S. Pat. No. 6,604,104 B1) prior art discloses system and method for managing the transfer of data/messages within an operational store. Data from a plurality of distributed data source is received at a messaging workflow module, from where the data/messages are prioritized and transferred to an operational store via translation module. The messaging workflow module employs message queue software that may guarantee the delivery of the data/messages will take place when there is a reliable connection between the operational store and the messaging workflow module. However, the invention as claimed "wherein the extracting, transforming, and wrapping (a)-(c), respectively, are isolated from the routing step (d)", when taken in the context of the claims as a whole, was not uncovered in the prior art teaching.

Nor were references uncovered that would have provided a basis of evidence for asserting a motivation that one of ordinary skill in the art at the time the invention was made, knowing of a system and method for managing the transfer of data/messages within an operational store using messaging workflow module, would have integrated or modified to teach the method for delivering information within a computing environment such that the extracting, transforming, and wrapping steps are isolated from the routing step.

Dependent claims are allowed as they depend upon allowable independent claims.

Any comments considered necessary by Applicant **must** be submitted not later than the payment of the issue and, to avoid processing delays, should preferably

Application/Control Number: 09/843,682 Page 5

Art Unit: 2194

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement for Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Charles E. Anya whose telephone number is (571) 272-

3757. The examiner can normally be reached on M-F (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, William Thomson can be reached on (571) 272-3718. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
